

Phonero Securely Scales Billing Operations with MOVEit

AT A GLANCE

Phonero, a Norwegian telecom provider, relies on Progress® MOVEit® Automation to secure and scale their payment processing and order operations. With over 30,000 business clients and 350,000+ active subscriptions, Phonero maintains regulatory compliance, security and operational efficiency by automating critical data transfers, including invoices and telecom records.

Challenge

Phonero needed a new file transfer solution to replace its legacy system that housed years' worth of operations. The company required a solution that was fast and simple to deploy but also highly secure, compliant and automated for processing sensitive billing data and telecom records while integrating with cloud and on-premises storage solutions.

“Security is paramount for Phonero. MOVEit meets all our compliance and security demands effortlessly, keeping business operations uninterrupted.”

Maroun Khalloul

Senior DevOps Engineer for Billing, Phonero

Solution

Adopt MOVEit to meet stringent EU and Norwegian data security regulations, including GDPR.

Install MOVEit Automation for automating over 280 daily tasks, reducing manual intervention and improving efficiency.

Integrate MOVEit with AWS S3, SharePoint and SFTP environments.

Results

Zero Downtime in Billing: Continuous automated processing of billing data prevents financial and operational risks.

Regulatory Compliance: Meets strict EU and Norwegian security requirements, maintaining customer trust.

Improved Response Time: Tasks that previously took hours now take just minutes to configure and deploy.

Scalability: MOVEit supports Phonero's growing operations.

Discover how MOVEit can deliver secure, compliant and automated file transfers for your business today.
